* The detailed list of services which are the part of the Package is defined in Detailed definitions of services. The presented table is only a dictionary of services available in the Package.

Detailed definitions of the services

Telephone Medical Assistance

The Telephone Medical Assistance is a Healthcare service provided by the healthcare organisation LUX MED in situations requiring urgent advice, through IT or telecommunication systems. The service includes the possibility of receiving Telephone Medical Assistance provided by medical specialists (physicians, nurses) in the scope of internal medicine/family medicine/paediatrics/nursing using the LUX MED's nationwide infoline, 24 hours a day.

In medically justified cases, a medical specialist may refer the Patient to an outpatient medical consultation, decide to call an ambulance, or refer the Patient for urgent admission to the Hospital Emergency Department.

Note: No e-Prescriptions for vaccines, potent drugs, drugs that can cause addiction and postcoital contraception (emergency contraception) and no referrals for examinations using ionising radiation, biopsies, endoscopic examinations and exercise tests are issued during Telephone Medical Assistance. The provision of services in the form of Telephone Medical Assistance is only for the benefit of a Patient who has concluded the Agreement or who is indicated as a person entitled to Healthcare services under Telephone Medical Assistance. The Patient cannot make Telephone Medical Assistance service available to other individuals. The Patient bears full civil and criminal liability for the fact that the data provided are consistent with the facts. A Telephone Medical Assistance does not replace an emergency service in a state of life or health threat. A Telephone Medical Assistance does not replace an outpatient consultation because it does not enable direct examination. The final decision to issue an e-Prescription/e-Sick Leave during a Telephone Medical Assistance is at the discretion of the physician who may refuse to issue an e-Prescription/e-Sick Leave, based on medical indications and the Patient's welfare.

Online Consultations

The Online Consultation is a Healthcare service provided by the healthcare organisation LUX MED through IT or communication systems. LUX MED enables the Patients an interactive individual consultation with a medical specialist (doctor, midwife or nurse) via means of distance communication i.e. the Patient Portal. The Patients with full access to the Patient Portal may benefit from Online Consultations. Time accessibility of Online Consultations with a doctor, a midwife and a nurse is a consequence of the schedule of medical specialists and is visible under "Online Consultation" ("Konsultacje online") tab. The Patient can choose a communication channel: video, audio or text.

Since medical specialists answering questions have access to the medical records of the Patient, in situations of medical necessity, they can order specific tests or refer the Patient to a different specialist. Online Consultation is exclusively available for the Patient who has logged in the Patient Portal and the content of Online Consultation is saved and constitutes a part of the medical documentation of the Patient. Online Consultations include listed below medical specialists consultations which do not require contact with a specialist in person.

The service covers Online Consultations in the following scope:

- internal medicine/family medicine (from the age of 18 years)
- pediatrics (under the age of 18 years)
- pediatric nursing
- obstetrics

Note: Online Consultation with a specialist does not replace an outpatient consultation because it does not enable direct examination. In order to use the Online Consultation, the Patient after logging into the account on the Patient Portal in the "Online Consultations" tab sets himself in the queue waiting to use the service. The provision of services in the form of Online Consultations is only for the benefit of a Patient who has concluded the Agreement or who

is indicated as a person entitled to Healthcare services under Online Consultations. The Patient cannot make Online Consultation service available to other individuals. The Patient bears full civil and criminal liability for the fact that the data provided are consistent with the facts.

Within the Online Consultations the Patient receives a Healthcare service, and as a part of that service may be issued: a referral for diagnostics, a referral to another specialist for the purpose of obtaining another Telemedicine Advice or a referral to another specialist in order to obtain a Healthcare service as part of an outpatient service, an e-Prescription for drugs for the continuation of chronic treatment, a de novo e-Prescription based on medical records and medical indications arising in the course of a Online Consultation, or a medical certificate for medical indications. In medically justified cases, while carrying out Online Consultation, a medical specialist may refuse to give advice at a distance and refer the Patient to an outpatient consultation with a doctor, a nurse or a midwife. No e-Sick Leaves and referrals for examinations using ionising radiation, biopsies, endoscopic examinations and exercise tests are issued during Online Consultations. The final decision to issue an e-Prescription during Online Consultation is at the discretion of the physician who may refuse to issue an e-Prescription based on medical indications and the Patient's welfare. No e-Prescriptions for vaccines, potent drugs, drugs that can cause addiction and postcoital contraception (emergency contraception) are issued during Online Consultation.
